

## ABSTRACT

Fauziah, Renanda Miftachul.2019.The Anxiety of Auggie in R.J Palacio's *Wonder* novel. Undergraduate Thesis, English Language Education Department, Faculty of Teacher Training and Education University of PGRI Adi Buana Surabaya. Advisor : Dra. Wahyu Bandjarjani, M. Pd.

Keywords: *psychoanalytic theory, reality anxiety, impact on auggie, wonder novel.*

This research aims to describe how anxiety is reflected to the main character of Auggie in the novel and to reveal its impact on Auggie's anxiety. Anxiety is the part of psychoanalytic theory which is the branch of psychological theory. It is a condition which possibly happens, but it will be something dangerous if it does not get the right handling. It followed by an uncomfortable feeling characterized as worry, fear, unhappy moods that we can feel through numerous levels. There are three kinds of anxiety namely neurotic, reality anxiety and moral anxiety. This research only focused on Reality anxiety of Auggie in *Wonder* novel.

The type of this research was descriptive qualitative. The researcher got the data from the novel which included the quotations and sentences. The techniques of collecting the data were reading the *wonder* novel repeatedly, taking quotations, and classifying. The technique of data analysis was descriptive interpretative which comprised four procedures, namely; data reduction, data display, data validity and conclusion.

The result of this research showed that reality anxiety of Auggie when he got a deformed face was because of his surgeries since birth. The researcher found the reality anxiety of Auggie were fear, confusion and sadness. The researcher also found the impact on Auggie that there was Auggie who did not want to go to school because his friend bullied him. Auggie felt anxious about what his friend talked about him. The researcher wishes that this research will be useful for the readers who want to understand about anxiety of Auggie in R.J Palacio's *Wonder* novel. Also for English teaching, this research can help them to increase the knowledge about language function about anxiety, such as; to give suggestions, recommendations, and expressing anxiety. For further research, other research can analyze the other aspects of anxiety, such as neurotic and moral anxieties.
