DEDICATION

This thesis is dedicated to all of the families and the relatives with all of humility and sincerity:

1. Allah SWT who has been giving me a power, healthy and brain to finish this thesis. Because without Allah we are nothing.
2. Thanks to my parents and my younger brothers who always support me to finish my thesis.
3. Thanks to my Advisor Dr. Endang Mastuti Rahayu, M.Pd., as the first advisor who always give me supports and guidance until the end of this thesis is completed
4. Thanks to my Advisor Mrs. Hertiki, S.Pd., M.Pd., as the second advisor who had guided and assisted the researcher to correct the grammar in writing this thesis. Thankyou so much.
5. My bestfriends who always support and gives the researcher motivation, especially for Novita Andriana, Kristiana Rap Uliroha and Riska Febriani.

MOTTO

“Success is not a final, only an achievement.”

ACKNOWLEDGEMENT

In the name of Allah, the most Gracious, the most Merciful, praise be to Allah SWT lord of the world, so that the researcher can finish this thesis as a partial fulfillment of the requirement for the graduate degree.

Arranging this thesis, the researcher truly realized that it will never finish without any help from other sides. Therefore, the researcher would like to deliver gratitude for everyone who gives support and motivation to accomplish this research, especially:

1. Dr. Suhari, S.H., M.Si as Dean of Faculty of Teacher Training and Education.
2. Dra. Siyaswati, M.Pd as the Head of English Language Education Department.
3. Dr. Endang Mastuti Rahayu, M.Pd as the 1st advisor.
4. Hertiki, S.Pd., M.Pd as the 2nd advisor
5. Mokhammad Marjoko, S.Pd., M.M as the Head of SMKN 1 Sooko Mojokerto.
6. Nofita Yanti, M.Pd as the English Teacher of SMKN 1 Sooko Mojokerto.
7. All of the students SMKN 1 Sooko Mojokerto especially 10th OTKP 1 and 10th OTKP 3 for cooperation to be sample class in this research.
8. My beloved parents without them I am nothing, and two younger brother who gives me support.
9. All of autor's friends in C Class English Department 2016
10. My bestfriends who always support and gives the researcher motivation, especially for Novita Andriana, Kristiana Rap Uliroha and Riska Febriani.

The researcher realizes that this thesis is far from being perfect. Therefore, the criticism and suggestions are always expected for the researcher. May this thesis give advantages.

Abstrak

Penelitian ini bertujuan untuk mengetahui pengaruh penggunaan cerita digital dalam prestasi berbicara siswa. Masalah berbicara bahasa Inggris pada siswa yang disebabkan oleh kelancaran, malu ketika mereka mencoba berbicara bahasa Inggris, dan kekurangan kosa kata. Para siswa juga kurang menarik dan merasa bosan di kelas karena guru tidak menggunakan media. Oleh karena itu, peneliti menggunakan media cerita digital untuk membantu siswa di kelas berbicara.

Penelitian ini menggunakan pendekatan kuantitatif dengan dua grup yaitu kelompok design pre-test dan post-test. Populasi dari kelas 10 di SMKN 1 Sooko Mojokerto yang terdiri dari 367 siswa dalam 11 kelas. Peneliti menggunakan cluster random sampling sebagai teknik percobaan. Sampel dari penelitian ini terdiri dari 68 siswa. Peneliti mengambil kelas X Otkp-3 sebagai kelas eksperimen dan X Otkp-1 sebagai kelas control. Teknik pengunggulan data adalah ujian lisan. Teknik menganalisis dan menggunakan rumus t-test.

Hasil penelitian menunjukkan bahwa t-hitung 2.189 dan derajat kebebasan 66. Nilai dari t-tabel 1.996 dengan taraf signifikan 0.05. Menyimpulkan bahwa hasil dari nilai t-hitung lebih tinggi daripada t-tabel. Jadi Ha (Hipotesis alternatif) diterima dan H0 (Hipotesis Nol) ditolak. Berdasarkan data analisis bisa disimpulkan bahwa pengajaran berbicara menggunakan media cerita digital bisa member positif terhadap prestasi berbicara.

Kata Kunci: cerita digital, prestasi berbicara siswa

INTRODUCTION

Speaking ability is the ability of students to express their ideas orally which is represented by a speaking score. Speaking is only an oral trial of the abilities that it got from structure and vocabulary. Speaking skill is more complex and difficult than people assume, and speaking learning is like learning other cases in language learning, naturalizing many case to language teacher (Risnnnadedi, 2001: 56-57).

After the researchers did pre-test and post-test, the researchers was knowing had many reasons for the problem from the student about

speaking English. Some students of SMKN 1 Sooko Mojokerto found difficulties to speak English, they had many reasons for the problem. Fluency was the most problem, the students were not often fluent in English, it was because they were lack of habit for speaking English. Second, the students were shy when they tried to speak English because they were afraid of if they made mistakes or wrong pronunciation. Third, the students did not often have any idea what they should speak when the teachers asked them to speak English. Fourth, was the lack of vocabulary, Megawati & Mandarani (2016) (in Meylina) in their research found problem that are

often faced by students when speaking English at a minimum of English is to practice speaking. In the fact, the key of fluent in speaking English is to practice it. So if they do not practice their speaking skill be worst and stuck. Then, if they keep doing that, so they do not make any progress of it.

The cause for all those problem can be from the students or teachers or can be from both of them. The cause from the students was they were too afraid or shy to speak English and they did not know what thing that they should talk about. While the cause of the teacher did not use media when they got the teaching learning process, so the students were less interesting to follow the class.

Digital storytelling is a good media to be used in speaking class. Digital storytelling nowadays is different with usual storytelling at the school, it is more interesting because can provide the use of technology. Moreover, the era of learners that is living in the world nowdays can be categorized as the digital learners (Presnsky, 2008). Consequent, the use of the digital media like digital storytelling can develop students' motivation in speaking class. Moreover, students' imagination and creativity will be raising using digital storytelling media.

In this case, there were some similarities from previous research conducted by (Arifiah, 2018), The Use of Digital Storytelling to Improve the Seventh Graders' Speaking Skill of SMPN 1 Seyegan Sleman. This research, result showed that there was a significant improvement from the pre-test and post-test. The mean score of the pre-test was 5.6 while the result of post-test of cycle 1 was 7.8 and the result of post-test of cycle 2 was 8.0. the result of interview and questionnaire showed that digital storytelling could improve the students' motivation and interest in speaking and eventually develop their speaking skill in English. It could be concluded that digital storytelling media can be effective media to teach speaking. That was why the researchers want to conduct a research with the title "The Influence of Using Digital Storytelling Media on Students' Speaking Achievement for 10th Grade of SMKN 1 Sooko Mojokerto".

RESEARCHMETHOD

In this case, the researchers used true experiment design. The researchers used pre-test and post-test control group design. The researchers wanted to use this design because this sample used a pretest that would made it easier for researcher to collect the data and provided treatment to students who would be organized the

materials and plan for the digital storytelling project/assignment to the students speaking achievement.

(Sugiyono, 2015) said that population is generalization which consist of object or subject that has certain qualities and characteristics are determined by the writer for the study and drawn the conclusion. It means that population is not only people, but other object and natural objects. The population of this study was 10th grade students of SMKN 1 Sooko Mojokerto which consist of 367 students in 11 classes.

The researchers used cluster random as a technique of sampling. The population was big and more than 100. So, the researchers did not need to observe all of the population because it would spend much time and energy. The researchers took the students from population for sample as randomly without see the value or degree of the students. The researchers chose the sampling because saw the total of the students, not saw the abilities students. So, the researchers took the sample used coin who got the number part as control class and who got the mythical bird as experiment class. The researchers select of the sample by 2 lottery to determine of experimental and control class. Finally obtained X Otkp-3 as the experimental class and X Otkp-1 as the control class.

The researchers used a test as an instrument. The researchers applied oral test to testing students' speaking achievement. The test aimed at measuring the student's speaking achievement, where the students were asked to do the subjective test. This test to find out how the results of the classes who got the treatment using digital storytelling media in their learning compared with the classes that not using digital storytelling media in teaching speaking. So, the researchers uses some the steps of teaching learning process using digital storytelling media in this research:

Procedure :

The researchers opened the class, and gave brainstorming about the materials. The researchers asked the students to make a group discussion to make the project of digital storytelling media. The researchers gave materials about making up short dialog/ conversation about intention or plan to do something in the future to the students. The researchers gave instruction about the media and present the examples of digital storytelling video to the students. The researchers asked every group to concept map, generate story boar and then create a script for written text narration. They organized the materials and plan for the digital storytelling project/assignment. Every group represent of their

project. The every group got feedback and value from the researcher.

After teaching in the classes of experimental and control class with different media, the researchers give post-test to the students. The test was almost same questions as pre test questions, because the researchers want to know the influence of using digital storytelling media on students speaking achievement. The material for test was about intention or plan to do something in the future.

In the data analysis the researchers used hypothesis comparative two sample because this study was used two groups.

The researchers used t-test for this research to analyze the influence of using digital storytelling media on students speaking achievement.

RESULT OF THE STUDY

From the result of calculating the data of experimental group class and control group class by using t-test formula above, the researchers concluded that :

By using the significance level of 5% and degree of freedom 5% (df), with formula $df = N_x + N_y - 2 = 34+34-2 = 66$, was derived t-table = 1,996, it means H_0 (Null Hypothesis) to be rejected because the result of t-count was 2,189. So, the result of t-count was higher than t-table ($2,189 > 1,996$). The information about t-table of t-calculation it can be seen at the appendix in this research. From the data, it shows that this research has an influence because t calculate $>$ t table. So, the alternative hypothesis (H_a) was accepted and null hypothesis (H_0) was rejected. It means there is significant influence of using digital storytelling media on students speaking achievement for 10th grade of SMKN 1 Sooko Mojokerto in the 2019-2020 academic school year.

CONCLUSION AND SUGGESTION

By using digital storytelling was more influence because they more active, creative, enjoy, and did not feel bored. Used digital storytelling media the students had a highest score of post-test was 90 and the lowest was score of post-test was 65. The score was acceptable because the students showed their enthusiastic participation during the teaching and learning in the class. The enthusiastic of students could be indicated from the process which the student enjoyed the class. So, digital storytelling had positive influence toward students' speaking skill in using making up short dialog/conversation

about intention or plan to do something in the future for 10th grade of SMKN 1 Sooko Mojokerto.

However, the suggestion from the study are:

1. For students:
By using media, the students are more active and interested in learning English. With using digital storytelling, the students can practice how to speaking with their friends, share ideas, practice how to make decision and work on groups. It is can make the students having fun to learning English.
2. For teacher:
Teacher should build good atmosphere to encourage students to have fun in the process of teaching learning, so it would be easy for the students to follow the lesson and also when the teacher uses media on speaking class, the students are more interested to follow speaking class and do not make the students bored in class.

Song: Expressing Intention

Lyrics: Rustiani Widiasih

Vocal: Shelly and riska

Music: Twinkle little star

I am going to the sea, I will have my holiday
I want to go there with you, I would like to go with you
Yes, I think I will go there, I am planning to go with you
I have decided to go, I'm thinking of going with you
Perhaps I will play the sand, May be I will see the sea
I intend to go with you, We will swim the deepest sea
