

## APPENDICES

### 1. Appendix 1

#### Teaw: Global Warming

We're killing the earth, and that's really fun  
No one believes us because we are young  
Our forests are burning to ash in a second  
Ask California, they'll tell you about it  
They'll tell you how big they've have lost all their homes  
While they turn a blind eye and Tweets on his phone  
Global Warming's an expensive little hoax  
For the last time, this is not a joke  
Our factories are working and toxin's emitting  
Our ozone is crumbling and we won't stop putting the chemicals  
In what we're trying to breathe  
Our future is stolen, and we are the thieves  
The sea levels are rising, and icebergs are melting  
The coral reefs are dying, and no one is helping  
Don't you realize they keep the oceans alive?  
This started back in 1985  
So don't come to me when your child can't breathe

Of what a tiger is cause they're extinct  
Don't cry to me when your fur coat isn't clean  
The endangered list is now 41, 416  
Dear 2045 I don't think we're gonna survive. If you end up  
hearing this story I just wanna say I'm sorry

## 2. Appendix 2

### **WorldFoodProgrammer: Are You With Us?**

Do you know

Climate change affect food insecure people more than we think.

There will be 189 million more food insecure people in the world  
if the temperature gets 2°C warmer.

The number of extreme weather events, such as droughts, floods  
and storms, in developing countries has doubled since they early  
1990s.

And economic loses and damages from storms, wildfires and  
floods have amounted to USD\$ 150 billions in 2019

Climate change acts as a risk multiplayer for development,  
making existing problems in the poorest and most food insecure  
countries worse.

**NOW YOU KNOW!**

what are you going to do about it?

### 3. Appendix 3

#### **Technality: Extreme drought around the world exacerbated by climate change**

Across the world, climate change is worsening droughts, and it's bringing up the past. Literally.

In Texas, these dinosaur tracks from 113 million year ago were exposed.

Near the Hoover dam, dropping water levels are revealing human remains.

World war two battleship are emerging in Europe still loaded with unexploded bombs.

A bridge built by emperor Nero two thousand years ago, is now visible in Rome.

Message from the past has been found too.

These "hunger stones" in the Czech Republic were carved the last time the water got this low. As a warning the future generations that the lack of water could lead to another famine.

One reads: "if you see me, weep"

From dinosaur tracks, to sunken ship, Roman ruins and forgotten bombs. Our world's climate is changing before our eyes, and it's bringing back the past.

So what does this mean for our future?

## RECORDS OF THESIS SUPERVISION SESSIONS

Student's Name : Muhammad Rizki  
Student's Reg. Number : 195300065  
Department : English Language Education Department  
Thesis Title : Narration about Climate Change issue in three TikTok content videos

No.	Dates	Materials	Advisor
1	Oct 11, 2022	Thesis proposal revision	
2	Oct 17, 2022	Chapter 1	
3	Oct 25, 2022	Revision Chapter 1	
4	Nov 02, 2022	Chapter 2 and 3	
5	Dec 27, 2022	Revision	
6	Jan 03, 2022	Chapter 4	
7	Jan 12, 2023	Revision Chapter 4	
8	Jan 25, 2023	Revision Chapter 4	
9	Feb 02, 2023	Chapter 5	
10	Feb 06, 2023	Revision Chapter 5	
11	Feb 08, 2023	Checking chapters 1-5 and Abstract	

The thesis supervisions have been completed on 9<sup>th</sup> February 2023.

Surabaya, 9<sup>th</sup> February 2023
