

ABSTRACT

This study aims to identify the effect of dividend, leverage and profitability policies on share prices in the real estate and property industries listed on the IDX in 2015-2019. This study uses purposive sampling to obtain illustrations of 7 real estate and property industries listed on the IDX in 2015- 2019. The type of information used is secondary information from the Indonesia Stock Exchange. The analytical procedure used is multiple linear regression analysis with SPSS 20 as a tool. The results of the study show that partially the dividend policy variable has a negative and significant effect on stock prices. Leverage has a positive and significant effect on stock prices. Profitability has a positive and significant effect on stock prices. On the contrary, it simultaneously influences significantly the dividend policy, leverage and profitability variables which have a positive and significant impact on stock prices.

Keywords: Dividend Policy, Leverage, Profitability, Stock Price
