

## ABSTRAK

Piranha, Egga Dea. 2019. *Pengaruh Metode Outdoor Study Terhadap Hasil Belajar Menulis Laporan Informatif Tentang Perubahan Musim di Alam Kelas III SD HANGTUAH 10 JUANDA*. Skripsi, Pendidikan Guru Sekolah Dasar, Fakultas Ilmu Pendidikan, Universitas PGRI Adi Buana Surabaya. Pembimbing: (1) Drs. Bahhauddin Azmy, M.Pd. (2) Drs. H. Atnuri, SH., M.Pd.

**Kata kunci:** *Hasil Belajar, Metode, Outdoor Study.*

Bahasa Indonesia merupakan salah satu mata pelajaran pokok dalam kurikulum pendidikan di Indonesia. Bahasa Indonesia memiliki karakteristik khusus baik berupa kenyataan atau kejadian dan hubungan sebab akibatnya. Penelitian ini bertujuan untuk menguji adanya pengaruh metode *Outdoor Study* Terhadap Hasil Belajar Menulis Laporan Informatif Tentang Perubahan Musim di Alam Kelas III SD Hang Tuah 10 Juanda.

Desain dalam penelitian ini menggunakan *Quasi Experimental Design* dengan bentuk *Posttest Only Control Design*. Populasi dalam penelitian yaitu seluruh siswa kelas III SD Hang Tuah 10 Juanda. Pengambilan sampel menggunakan *purposive sampling*. Teknik pengumpulan data menggunakan tes. Pengambilan data dari rata-rata nilai hasil tes kelas kontrol yaitu 59,68 sedangkan nilai hasil tes kelas eksperimen yaitu 75,4. Independent Samples T-Test, untuk hasil belajar  $t_{hitung} = 5,85$  lebih besar dari  $t_{tabel} = 2,06$  dan signifikansi 5% atau 0,05.

Berdasarkan penelitian yang dilakukan dapat ditarik kesimpulan bahwa pembelajaran yang menggunakan metode *Outdoor Study* lebih efektif dibandingkan dengan metode *konvensional*. Hal itu dibuktikan dengan data hasil penelitian dimana nilai rata-rata kelas kontrol lebih rendah dibanding nilai rata-rata kelas eksperimen.

## ABSTRACT

Piranha, Egga Dea .2019 .*The Influence Of A Method Of Outdoor Study Of The Results Of Learn Writing Report Than Informative About Seasonal Changes In Nature Class III Primary School Hangtuh 10 Juanda*. Thesis, Education Primary School Teachers, The Faculty Of Education, University PGRI Adi Buana Surabaya. Tutors: (1) Drs. Bahhauddin Azmy, M.Pd. (2) Drs. H. Atnuri, SH., M.Pd.

**Keyword:** *Study Results, Method, Outdoor Study.*

Indonesian language is one of lessson load in education curriculum in indonesia. Indonesian having the characteristics of special reality or the excellent and relations for as a result.This study attempts to test the influence in the outdoor method study learn writing than informative report about class III seasonal changes in the primary school Hang Tuah Juanda 10.

Design in was used in the study experimental a quasi including on the instrument types with the form of the posttest only control including on the instrument types. Percent of the population been disclosed in the research even all she student of class III state and private primary schools Hang Tuah 10 Juanda. The sample collection using purposive sampling. Method of the technique of the collection of data using tests. Over the withdrawal of funds the data from average test scopres a class of control 59,68 while test scores a class of the experiment 75,4. Independent samples t-test, to of study result of the  $t_{count} = 5,85$  is greater and mightier than  $= t_{table} 2,06$  and significance of the 5% or 0,05.

Based on this study which was conducted a conclusion can be drawn that of learning which he uses the method outdoor study more effective compared with a method of network of the bank conventional .It is possible as much dibuktikan with the data the results of the study where the value of rata-rata a class of control earnings are lower than that the value of rata-rata a class of the course of this experiment.
