

Abstract

The purpose of this study is to determine the effect of third-party funds, capital adequacy ratios, and non-performing loans on the profit growth of rural banks in the Surabaya region. This study used a sample of six rural banks registered with the Financial Services Authority in the 2019–2021 period. The data analysis techniques used are descriptive statistics, the classical assumptions test, multiple linear regression analysis, hypothesis testing, and the coefficient of determination. The results of the study provide evidence that there is no effect of third-party funds, capital adequacy ratios, or non-performing loans on profit growth.
