**VISITING NIAGARA FALLS**

Niagara Falls is the collective name for three waterfalls that cross the international border between the Canadian province of Ontario and the USA's state of New York. They form the southern end of the Niagara Gorge. From largest to smallest, the three waterfalls are the Horseshoe Falls, the American Falls and the Bridal Veil Falls. The Horseshoe Falls lie on the Canadian side and the American Falls on the American side. They are separated by Goat Island. The smaller Bridal Veil Falls are also located on the American side, separated from the other waterfalls by Luna Island.

There are various attractions that people can enjoy in Niagara Falls, six of them are described here.

The first to enjoy in Niagara Falls is Cave of the Winds. This attraction helps people get closer to the falls and go face-to-face with the pounding waters of the Falls. People can get soaked on the Hurricane Deck where they are just feet from the thundering waters. Waterproof clothing and sandals are provided. A trip at night when the Falls are illuminated in a rainbow of color is really amazing.

The second charm is Maid of the Mist Boat Tour. It is a world-famous scenic boat tour of the American and Canadian Falls for about a half-hour ride. People may access the tour via the Observation Tower elevator at Prospect Point in the state park. The boat operates mid-May until late October.

The next to visit in Niagara Falls is Niagara Adventure Theater. Here tourists may enjoy the most powerful and involving film experience that brings reality to life on a 45 foot screen. Audience members are given the privilege to discover the thundering Falls from a completely new and exhilarating perspective, and plunge over them. The theater shows hourly and free multi-language headsets are made available.

Niagara Science Museum is another place to visit. It is a sanctuary for the preservation and appreciation of old science instruments and philosophical apparatus. The fifth point of interest is Niagara's Wax Museum of History. Here, life-size wax figures portraying dramatic history of Niagara Falls are presented to guests. They can see Fort Niagara Scene, Indian Village, old store, blacksmith and barber shop scenes and how electricity is made. Wax figures of Julia Roberts, Princess Diana and many more are displayed here, too.

Finally, people can also enjoy Rainbow Air Helicopter Tours above and around the American and Canadian Falls. The tours start from downtown, next to the entrance to the Rainbow Bridge, and

open from 9am to dusk when weather permits. The tours operate every day from second weekend in May until October 31st.

The Niagara Falls are renowned both for their beauty and as a valuable source of hydroelectric power. Managing the balance between recreational, commercial, and industrial uses has been a challenge for the stewards of the falls since the 19th century.

### **THE SURAMADU BRIDGE**

The Suramadu Bridge (Indonesian: Jembatan Suramadu), also known as the Surabaya–Madura Bridge, is a cable-stayed bridge between Surabaya on the island of Java and the town of Bangkalan on the island of Madura in Indonesia. Opened in June 2009, the 5.4-km bridge is the longest in Indonesia and the first bridge to cross the Madura Strait.

The cable-stayed portion has three spans with lengths 192 meters, 434 meters, and 192 meters. The bridge has two lanes in each direction plus an emergency lane and a dedicated lane for motorcycles. The first toll bridge in Indonesia, fares have been initially set at Rp30,000 for four-wheeled vehicles and Rp3,000 for two-wheelers.

The bridge was built by a consortium of Indonesian companies PT AdhiKarya and PT WaskitaKarya working with China Road and Bridge Corp, and China Harbor Engineering Co. Ltd. The

total cost of the project, including connecting roads, has been estimated at 4.5 trillion rupiah.

Construction started on August 20, 2003. In July 2004, a girder collapsed, killing one worker and injuring nine others. Work on the bridge halted at the end of 2004 due to lack of funds, but was restarted in November 2005. The main span of the bridge was connected on March 31, 2009, and the bridge was opened to the public in June 10, 2009. Within a week of the opening, it was discovered that nuts and bolts as well as maintenance lamps had been stolen and that there was evidence of vandalism of cables supporting the main span.
