

ABSTRAK

Lutfiatus, Nila S. 2021. *Pengaruh Kegiatan Membatik Dengan Media Kecipir Terhadap Kemampuan Kreativitas Anak Usia Dini Kelompok B TK Mutiara Hati Driyorejo Gresik Tahun Pelajaran 2020-2021*. Program Studi Pendidikan Guru Pendidikan Anak Usia Dini. Fakultas Pedagogi dan Psikologi. Universitas PGRI Adibuana Surabaya. Pembimbing (1) Drs. A. Fachrurrazi, M.Pd. Pembimbing (2) Titah Kinasih, S.S., S.Pd.,M.Si

Kata Kunci : Membatik, Media Kecipir, Kreativitas.

Penelitian ini dilatarbelakangi oleh permasalahan bahwa kemampuan kreativitas anak usia dini kelompok B belum berkembang. Hal itu disebabkan karena guru banyak memberikan lembar kerja, kurangnya media, dan tidak memberikan kesempatan untuk bereksplorasi sehingga anak tidak percaya diri dalam melakukan kegiatan kreatif. Tujuan penelitian untuk mengetahui pengaruh kegiatan membatik dengan media kecipir terhadap kemampuan kreativitas anak usia dini kelompok B TK Mutiara Hati Driyorejo Gresik.

Metode penelitian yang digunakan yaitu metode kuantitatif dengan rancangan penelitian pre-experimental design One Group Pretest-Posttest. Subjek penelitian anak kelompok B TK Mutiara Hati Driyorejo Gresik berjumlah 11 anak. Metode pengumpulan data adalah observasi dengan alat penilaian berupa lembar observasi kinerja serta dokumentasi. Teknik analisis data menggunakan rumus uji t.

Hasil perhitungan menggunakan rumus uji t menunjukkan bahwa t_{hitung} 11.8 dan t_{tabel} 1.81246 untuk taraf signifikansi 0,05, dan 2.76377 untuk taraf signifikansi 0,01. Dari hasil tersebut dapat diketahui bahwa nilai $t_{hitung} > t_{tabel}$ karena nilai t_{hitung} lebih kecil daripada nilai t_{hitung} , maka Hipotesis Nol (H_0) ditolak dan Hipotesis Kerja (H_1) diterima. Dapat disimpulkan bahwa kegiatan membatik dengan media kecipir berpengaruh terhadap kemampuan kreativitas anak usia dini kelompok B TK Mutiara Hati Driyorejo Gresik.

Abstract

Lutfiatus, Nila S. 2021. The Influence of Batik Activity with Winged Beans Media on the Creativity Ability of Early Childhood Group B in Mutiara Hati Kindergarten Driyorejo Gresik Academic Year 2020-2021. Early Childhood Education Teacher Education Study Program. Faculty of Pedagogy and Psychology. PGRI Adibuana University Surabaya. Supervisor (1) Drs. A. Fachrurrazi, M.Pd. Supervisor (2) Titah Kinasih, S.S., S.Pd., M.Si

Keywords: Batik, Winged Bean Media, Creativity.

This research is motivated by the problem that the creativity abilities of early childhood group B have not yet developed. This is because the teacher provides a lot of worksheets, lack of media, and does not provide opportunities for exploration so that children are not confident in doing creative activities. The aim of this research is to find out the effect of batik activities using winged bean media on the creativity abilities of early childhood group B in Mutiara Hati Kindergarten. Driyorejo Gresik.

The research method used is a quantitative method with a pre-experimental research design One Group Pretest-Posttest. The subjects of the research were 11 children in group B of Mutiara Hati Kindergarten Driyorejo Gresik. The data collection method is observation with assessment tools in the form of performance observation sheets and documentation. The data analysis technique uses the t test formula.

The results of calculations using the t test formula show that t count (t_{hit}) 11.8 and t table (t_{tab}) 1.81246 for the 0.05 significance level, and 2.76377 for the 0.01 significance level. From these results it can be seen that the value of $t_{(hit)} > t_{(tab)}$ because the value of t table is smaller than the value of t count, then the Hypothesis Zero (H_0) is rejected and the Work Hypothesis (H_1) is accepted. It can be concluded that the activity of making batik with winged bean media has an effect on the creativity ability of early childhood group B in Mutiara Hati Kindergarten Driyorejo Gresik.
